Division Guidelines:

There are many different division levels in the Hobbies department. These are based on *skill level*, allowing a broad spectrum of participation while providing a fair system for judging purposes. The honor system is used with regard to the proper Division placement for exhibitors. In other words, it is left to the exhibitors to determine under which Division he/she should exhibit. Judges may move entries to the next higher level if the work merits.

NOVICE

This skill level is for the very novice. An exhibitor may enter at this skill level for a maximum of two years, after which he/she will automatically move up to the Intermediate level. Award of Excellence winners will automatically advance to the Intermediate level.

INTERMEDIATE

This skill level is for the more experienced artist. An exhibitor who accumulates 15 blue ribbons* at this level, or one who wins three Award of Excellence ribbons, will be required to move up to the Open

Divisions. **The length of time it takes for an exhibitor to accumulate 15 blue ribbons is not a factor.*

ADVANCED

This skill level is for the amateur exhibitor whose work is competitive at the highest level of the art and for professionals who receive less than fifty percent of their income from the sale of their art.

OPEN

This level is for the exhibitor who teaches (or has taught) Decorative Painting on a regular basis and/or receives more than fifty percent of their income from selling their work.

Decorative Painting Judging Guidelines

- 1. OVERALL EFFECT:** The total composition should be pleasing and interesting - the products of all elements together, i.e., intensity, value, color scheme, center of interest area and light source.
- 2. COLOR MANAGEMENT:** A pleasing color balance, repetition, or flow of colors throughout the painting, which allows the eye to travel through the painting. The use of color scheme, color repetition, tints, accents, warm and cool colors.
- 3. VALUE CONTROL:** How light or dark an object is overall or the change from light to dark within an object, which creates form. Lack of value control makes for distraction and/or flat objects.
- 4. INTENSITY CONTROL:** The brightness or dullness of a color or objects.
- 5. STROKE CONTROL:** Strokes must be pulled with consistency, show flow and control. Comma strokes should have nicely rounded beads flowing into well tapered tails.
- 6. BLENDING SKILLS:** A graduation of values from light to dark, should be smooth without blotches or visible value lines. No over or under blending.
- 7. LINE WORK OR DETAILS:** Should be controlled and consistent, showing evidence of practice and attention given to details.
- 8. BACKGROUND:** Needs to support and enhance the overall composition. Good use of color scheme, cast shadows and light areas from light source and antiquing.
- 9. NEATNESS:** Should have an overall neat appearance without evidence of tracing lines (except watercolor), misshapen objects or evidence of clean up or untidy edges.
- 10. FINISH:** Should provide adequate protection for the painting without impurities and be skillfully applied. The back of objects should also be finished.
